3	List of activities for Internal Assessment component	31-32
4	Link for Examination policy	33

The College's Examination Management System (EMS) has improved due to IT integration and modifications to examination processes including Continuous Internal Assessment. These changes streamlined and modernised several examination system components, boosting security, confidentiality, accuracy, efficiency, and transparency.

Reforms in the examination procedures and processes

By using PHP software, which keeps track of student information, exam information, topic information, fee information, and exam scheduling information, the college's examination processes are now completely automated.

The college's exam system has several important components, such as:

1. Automated procedure: The college website provides pertinent information, including schedules, notifications, and results, and the entire test procedure is entirely automated. The results of the semester-end exams are published on a different portal Admin - PBSCAS (siddharthaexam.in) which is easily accessible to students.
2. Timely Results Declaration: In order to provide students with a timely outcome, the results of the Semester End Examination are announced within 30 days from the last exam.
3. Revaluation of Answer Scripts: By paying the required fee, students can get their answer scripts revaluated. This service is available to the student within a week to 10 days of the results being announced.
4. Supplementary tests: All semesters include supplemental tests that are administered soon after the results are announced, providing students with a chance to raise their performance.
5. Strict Actions against Malpractice: The college takes strong action against unfair practices in theoretical and practical exams. It is a malpractice crime for a candidate to try to influence teaching or non-teaching personnel for their own benefit. If misconduct is discovered at any point, it is dealt with harsh penalties.
6. Barcoding of answer scripts: To combat cheating during test evaluation, we added barcodes to answer scripts in the academic year 2022–2023.
7. Activity: Student participation in any one of the listed Co- curricular activities like participation in seminars/ workshops/conferences as well literature review etc., is given due marks in CIA.

IT Integration:

IT integration has accelerated the examination process, improving efficiency and transparency. Various examination operations, such as capturing internal and external marks, posting results, and creating mark memos, have been made possible through the use of ICT, providing greater convenience to all stakeholders. Using PHP software for calculating SGPA, CGPA, and grades improves accuracy and reduces human error.

The EMS enables effective communication among the college administration, professors, and students. It delivers automatic notifications for examination schedules, changes in timetable, submission deadlines, and result announcements to ensure timely information dissemination. The IT-integrated EMS allows for effective data administration and analysis. It maintains and

organises student records, examination data, and performance metrics, which are then utilised to generate meaningful reports.

Continuous Internal Assessment:

Implementation of Continuous Internal Assessment (CIA) is a key component of examination changes at PB Siddhartha College.
IT integration is crucial to PB Siddhartha College's CIA deployment. Midterm test, online exam, seminar with PPT presentation, and attendance comprise the CIA. CIA marks are submitted by personnel via college automation.

The php software has been highly useful in making the Examination Management System of P B Siddhartha College to run smoothly and for timely declaration of results.

Examination Management:

Efficient Scheduling: PHP can optimize exam schedules, considering factors like room capacity, instructor availability, and student preferences.

Automated Notifications: It can send automated notifications to students and faculty about exam dates, timings, and results.

Resource Allocation: PHP can help allocate resources like exam halls, invigilators, and stationery efficiently.

The operational details of the software are as follows:`

PBSC

Examination Management System
