CourseDescriptionandPurpose:

Financialreportingandanalysiscourseprovidesanunderstandingoffinancialaccountingandreporting fundamentalsforprospectiveconsumersofcorporatefinancialinformation,suchasmanagers, stockholders, financial analysts, and creditors. This course focuses on understanding howeconomic events like financing transactions and operating activities are recorded in the three mainfinancial statements (i.e., the income statement, balance sheet, and statement of cash flows/fundsflow). Along the way, students will develop the technical skills needed to analyze corporate financialstatements and disclosures for use in financial analysis, and to interpret how accounting standards andmanagerial incentives affect the financial reporting process. This course is well recommended forstudents who want a more in-depth overview of the financial accounting and reporting required forunderstanding firm performance and potential future risks through analysis of reported financialinformation, such as students intending to go into financial analysis and Financial Manager, securityanalyst,etc.

Course Outcomes:

By the end of the course, students will be able:

- CO-1 To provide the students with the basic concepts of financial accounting and preparation of Company Balance sheet
- CO-2 To discuss the various concepts, tools and practices in analysis and interpretation of financial statements.
- CO-3 To familiarize the students with the concepts of funds flow and cash flow for managerial decision making.
- CO-4 To provide the students with the knowledge of financial statement analysis through ratios.
- CO-5 To provide knowledge required for the preparation of reports understanding firm performance and potential future risks through analysis of reported financial information.
