*Re-accredited at 'A+' by the NAAC*

**23DSMIL121: Python Programming**

**Year of introduction: 2023-24**

**Offered to : ALL UG PROGRAMMES**

**Course Type : Minor 1(TH)**

**Teaching Periods: 60**

**Semester - II**

**No. of Credits:3**

**Course OBJECTIVE:** After taking the course, students will be able to use Python program a Scripting language and Exposure of various problems solving approaches of computer

<b>COURSE OUTCOME NO</b>	<b>Upon successful completion of this course, the student will be able to</b>	<b>PROGRAM OUTCOME NO</b>
<b>CO1</b>	Learn about concepts of programming and python	<b>PO1, PO2</b>
<b>CO2</b>	Understand the Decision making and looping controls available in Python Programs	<b>PO2, PO3</b>
<b>CO3</b>	Determine the process of using functions and modules	<b>PO3, PO4</b>
<b>CO4</b>	Implement the Data structures using Lists, Tuple, Dictionaries	<b>PO4, PO3</b>
<b>CO5</b>	Interpret the OOPs concept in Python.	<b>PO5, PO3</b>

**CO-PO MAPPING MATRIX**

	<b>CO - PO</b>	<b>PO1</b>	<b>PO2</b>	<b>PO3</b>	<b>PO4</b>	<b>PO5</b>	<b>PO6</b>
<b>23DSMIL121</b>	<b>CO1</b>	H	M				
	<b>CO2</b>		H	M			
	<b>CO3</b>			H	L		
	<b>CO4</b>			L	H		
	<b>CO5</b>			H		L	

**UNIT – I: Introduction, Data types, Operators:**

**12 Periods**

**Introduction to Programming:** Languages, Generations, Programming Paradigms, Debugging and Testing Approaches.

**Python :** Introduction, History of Python, Features of Python, Writing and executing python programs, constants, variables, reserved words, input operation, indentation,

**Data types in python:** integer, string, Boolean, Operators and expressions.

**UNIT – II: Decision making and looping****13 Periods****Control Flow: Selection or conditional branching** : if, if-else, if-elif- else, nested if.**Loop or iterative statements:** for, while, break, continue, pass. Example programs on control flow.**UNIT – III: Functions and Modules:****12 Periods**

Defining Functions, Calling Functions, Passing Arguments, Keyword Arguments, Default Arguments, Variable-length arguments, Lambda or Anonymous Functions, Global and Local Variables.

**Modules:** Creating modules, import statement, from import statement.**UNIT – IV: Data Structures:****13 Periods****Lists** : Creation, accessing values, updating values, list operations, list methods.**Tuple:** tuple creation, accessing values, deleting values, tuple operations. **Sets:** creation, set operations.**Dictionaries:** creation, accessing values, adding , modifying , deleting items, built-in dictionary methods.**UNIT – IV: Object Oriented Programming in Python:****10 Periods**

Introduction to OOP, Features of OOP, Merits and Demerits, Classes and Objects, Class method and self-Argument, Public and Private, the init method(constructor), Inheritance, polymorphism and Method Overriding.

**Error and Exception handling:** Handling Exception using try-except block, Raising Exceptions, User Defined Exceptions.**TEXT BOOKS**

Python Programming: Using Problem Solving approach, Reema Thareja, Oxford University Press 2017

**REFERENCE BOOKS:**

PYTHON PROGRAMMING A Modern Approach, Vamsi Kurama, Pearson Publications, 2017

**Recommended Co – Curricular Activities:**

(Co-curricular activities shall not promote copying from textbook or from others work and shall encourage self/independent and group learning)

**A Measurable**

- i. Assignments (in writing and doing forms on the aspects of syllabus content and outside the syllabus content. Shall be individual and challenging).
- j. Student seminars (on topics of the syllabus and related aspects (individual activity))
- k. Quiz (on topics where the content can be compiled by smaller aspects and data (Individuals or groups as teams))
- l. Study projects (by very small groups of students on selected local real- time problems pertaining to syllabus or related areas. The individual participation and contribution of students shall be ensured (team activity))

**B General**

- e. Group Discussion

f. Others

**RECOMMENDED CONTINUOUS ASSESSMENT METHODS:**

Some of the following suggested assessment methodologies could be adopted;

1. The oral and written examinations (Scheduled and surprise tests),
2. Closed-book and open-book tests,
3. Programming exercises,
4. Practical assignments and laboratory reports,
5. Observation of practical skills,
6. Individual and group project reports.
7. Efficient delivery using seminar presentations,
8. Viva voce interviews.
9. Computerized adaptive testing, literature surveys and evaluations,
10. Peers and self-assessment, outputs form individual and collaborative work.

**MODEL PAPER**

**23DSMIL121 : PYTHON PROGRAMMING**

**SEMESTER: II**

**TIME: 3 Hrs.**

**Max.Marks : 70M**

Note to paper setter: In Section A & Section B, for each question one sub question (A) must be a program meant for logical testing and another sub question (B) is meant for descriptive / Logical.

**SECTION A**

**ANSWER THE FOLLOWING QUESTIONS.**

**5 X 4 = 20 Marks**

1. a) Write different types of programming paradigms. (CO1, L1)

OR

b) Develop a python code to print sum and average marks of three subjects of a student. (CO1, L1)

2. a) Write a python program to find the factorial of a given number. (CO2, L1)

OR

b) Explain if-elif-else statement in python with example (CO2, L2)

3. a) Develop a python program for Lambda function. (CO3, L3)

OR

b) Explain about global and local variables in python. (CO3, L2)

4. a) Develop a python program to insert elements into a list, remove elements from a list and sort elements of the list. (CO4, L3)

OR

b) Compare lists and tuples in python. (CO4, L3)

5. a) Develop a python program to demonstrate Inheritance. (CO5, L3)

OR

b) Explain about classes and objects in python. (CO5, L2)

**SECTION B**

**ANSWER THE FOLLOWING QUESTIONS .**

**5 X 10 = 50 Marks**

6. a) List and explain data types in python. (CO1, L2)

OR

b) Write names of operators in python and explain them with examples. (CO1, L2)

7. a) Develop a python program to find whether the number is palindrome or not. (CO2, L3)

OR

b) Explain loops in Python with examples. (CO2, L2)

8. a) Explain different categories of arguments used in functions in python. (CO3, L3)

OR

b) Develop a python program to create a module and import it in another program.

(CO3, L2)

9. a) Develop a python program to create a dictionary and add, modify, delete values in the dictionary and print them. (CO4, L2)

OR

b) Define tuple. Explain about tuples with examples. (CO4, L3)

10. a) Develop a python program to demonstrate exception handling. (CO5, L3)

OR

b) Define method overriding. Explain with an example. (CO5, L2)
