

HABITAT CLUB

Habitat is the place where a plant or animal normally lives and grows. Habitat club is started to educate and make students aware of the importance of habitat in environment for sustainable development by growing various types of plants and trees in college campus.

Habitat club in coordination with Green, Biodiversity, Eco-clubs practice function with an objective to make the environment sustainable, clean, green for other organisms.

Habitat Club Activities

The activities of the club include developing and maintaining greenery in campus by tree planting, potting plants any time round the year.

Developing xeric and aquatic sample habitats are the future activities planned by the student coordinators.
